1. This communication is responsive to applicant's 4/27/06 amendments. The amendments have been entered. Claims 2-7 are now pending.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 2 and 5 are rejected under 35 U.S.C. 102(e) as being anticipated by Bayart et al. (US Patent No: 5,510,926).

Regarding claims 2 and 5, Bayart teaches an apparatus (figs. 1), comprising: an input port receiving a WDM optical signal including a variable number of second optical signals (col. 1, lines 35-38) having different wavelengths (col. 1, lines 42-50, col. 2, lines 35-37) and monitoring the received WDM optical signal (col. 2, lines 63-67); an amplifier (10, fig. 1) which amplifies the received WDM optical signal with a first mode in which the received WDM optical signal is amplified with an approximately constant gain during a process of changing the number of second optical signals (col. 1, lines 14-17, 34-37, col. 3, lines 25-34); and an output port (4, fig. 1) outputting the amplified WDM optical signal (col. 2, lines 47-50) and monitoring the amplified WDM optical signal output therefrom (col. 2, lines 43-46, col. 3, lines 61-62).

Art Unit: 2613

4. Claims 3-4 and 6-7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to M. R. Sedighian whose telephone number is (571) 272-3034. The examiner can normally be reached on M-F (from 9 AM to 5 PM).
